

NAME

gvgen – generate graphs

SYNOPSIS

gvgen [**-d?**] [**-cn**] [**-C***x,y*] [**-g***[f]**x,y*] [**-G***[f]**x,y*] [**-hn**] [**-kn**] [**-b***x,y*] [**-pn**] [**-sn**] [**-Sn**] [**-tn**] [**-T***x,y*] [**-wn**] [**-o***outfile*]

DESCRIPTION

gvgen generates a variety of simple, regularly-structured abstract graphs.

OPTIONS

The following options are supported:

- c** *n* Generate a cycle with *n* vertices and edges.
- C** *x,y* Generate an *x* by *y* cylinder. This will have $x*y$ vertices and $2*x*y - y$ edges.
- g** *[f]**x,y* Generate an *x* by *y* grid. If **f** is given, the grid is folded, with an edge attaching each pair of opposing corner vertices. This will have $x*y$ vertices and $2*x*y - y - x$ edges if unfolded and $2*x*y - y - x + 2$ edges if folded.
- G** *[f]**x,y* Generate an *x* by *y* partial grid. If **f** is given, the grid is folded, with an edge attaching each pair of opposing corner vertices. This will have $x*y$ vertices.
- h** *n* Generate a hypercube of degree *n*. This will have 2^n vertices and $n*2^{(n-1)}$ edges.
- k** *n* Generate a complete graph on *n* vertices with $n*(n-1)/2$ edges.
- b** *x,y* Generate a complete *x* by *y* bipartite graph. This will have $x+y$ vertices and $x*y$ edges.
- p** *n* Generate a path on *n* vertices. This will have $n-1$ edges.
- s** *n* Generate a star on *n* vertices. This will have $n-1$ edges.
- S** *n* Generate a Sierpinski graph of order *n*. This will have $3*(3^{(n-1)} - 1)/2$ vertices and 3^n edges.
- t** *n* Generate a binary tree of height *n*. This will have 2^{n-1} vertices and 2^{n-2} edges.
- T** *x,y* Generate an *x* by *y* torus. This will have $x*y$ vertices and $2*x*y$ edges.
- w** *n* Generate a path on *n* vertices. This will have $n-1$ edges.
- o** *outfile* If specified, the generated graph is written into the file *outfile*. Otherwise, the graph is written to standard out.
- d** Make the generated graph directed.
- ?** Print usage information.

EXIT STATUS

gvgen exits with 0 on successful completion, and exits with 1 if given an ill-formed or incorrect flag, or if the specified output file could not be opened.
